COMMENT

Consider these statements of reward in relation to the Master's discussion of rewards. First let us review the parable of the laborers in the vineyard. Here for all there is only one kind of reward. Each laborer received a penny. There is only one real reward for service growing naturally out of the service, and that is capacity for more service. But service is the very source of life. Jesus declared: "My meat is to do the will of Him that sent me."Increased capacity for service, then is the way to the life "more abundant," which Jesus declares He came to give.

In the second place consider the parable of the talents. Here two rewards are mentioned. One is increased responsibility and authority, the other is entrance into the joy of the Lord, of which He speaks in John's gospel, 15: 11; but in Jesus' life the joy is the result of service only.

In the third place we have the parable of the pounds. Here, again, faithfulness in the use of authority in a caparatively small matter brings increased responsibility and authority - increased opportunity and capacity for service; not foreign externals, but natural development of soul.

There is very little mention of this in the 789 emphases on rewards considered. Something of this is considered in 389 III 1-4, 389 IV 1-4, 398 III 1-4 and 409 I 3-4: 22 measures out of 789. The hymnal, therefore, in the treatment of the matter of rewards makes the christian service appear like a shrewd bargain with God - a little service here on earth; and then forever after nothing to do but sing and praise and enjoy oneself.

COMMENT

Reviewing this section one deplores greatly the utter selfishness displayed in hymn 598. While the Man of Gallilee seeing thru prophetic eyes stands weeping over Jerusalem as yet unharmed, the soul which professes to be His follower triumphantly "claps his wings of fire" over "nature's funeral pyre," utterly callous to all the suffering and loss. While the Christ of Gethsemane hangs stretched on Golgotha's cross he who claims allegiance to Him "views with smiles the flamming void," utterly heartless toward the agony and suffering thus entailed. Can such a thot be in harmony with the sympathetic Christ who "went about doing good."

Give of thy wealth to speed them on their way;

640 I 1

Go, ye messengers of God!

640 II 1-4

In the bosom of the deep
Where the skies forever smile

Let us all thy grace receive;
Suddenly return, and never,
Never more thy temples leave:

From this study we see that not all the emphases measured by W are of equal value to the World Service Program.

C

Final

Conclusions

Regarding this thesis the author draws the following conclusions:

1 - The measures are objective in that they are clearly defined and specifically delimited concepts whose meanings in the usually accepted understanding of the English language are capable of only one interpretation.

2 - They show themselves objective in the second place because of the high correlation they exhibit in the hands of others. To test this point three hymns were selected from the Methodist Episcopal hymnal practically at random. The only conditions being that the hymns should not be too long or involved, that they should be somewhat scattered, and that they should be measured by several measures. It was thot that a large number of hymns were not necessary to carry out the purpose. If the measures were objective with a few they would be objective with all. Moreover, it would be difficult to secure the help of the desired class of busy persons if too much time were demanded of them. With this in mind the three hymns selected are numbers 185, 261, and 325. Three gentlemen were asked to use the measures upon these: they are the Rev. A.E. Perry, M. A. (Harvard), B.D. (Hartford), Ph. D. (Chicago).

Rev. Harold C. Metzner, B.A. (Ohio Wesleyan), M.A. (Ohio Wesleyan), B.D. (Garrett Biblical Institute), Ph. D. (Union Theological Seminary).

Ralph E. Peck, A. B. Wesleyan University.

The Rev. A.E. Perry is a professor in the Bangor Theological Seminary. The Rev. H. C. Metzner is pastor of the Methodist Episcopal Church at Orono near which is located the University of the State of Maine. Ralph E. Peck is president of the East Maine Conference Seminary located at Bucksport, Maine. In this group we have a professor, a pastor and an administrator. Mr. Peck, before taking the presidency of the seminary, was in the business department of the Board of Education of the Methodist Episcopal Church, and therefore has had practical business experience in addition to his work in education.

The work of these men working separately and at a distance from each other shows a correlation of .98.

3 - The measures satisfy all the commutations of three, and, therefore, have a wide range of practical usefulness. That is, for instance, the standard may be changed while the symbols and the material remain constant; the measures may be added to or only a portion of them used while the material

and standard remain constant, or the material may be changed while the symbols and the standard remain constant, and so thruout all the possibile commutations of three.

4 - This method of measuring poetry may be useful in several ways. It can be used to compare scientifically any two or more hymnals of different denominations as well as those of the same denomination; or in the general field of literature it may be used to compare any two or more volumns of poetry. It is not limited to any particular language of mankind, but is as useful with the Vedas of Hinduism as with the contents of the Methodist Episcopal Hymnal. And finally it may be used to compare hymn with hymn in the working out of any specified program such as the development of a hymn-book, or poem with poem in the compiling of any volumn of general poetry.

5 - The measures may be used by one person working alone or by a committee working together.

Conclusions regarding the Methodist Episcopal Hymnal:

The author of this thesis first incited by a feeling of the tremendous importance of the idea and ideal-forming power of a printed hymn-book frequently used by a worshiping group endeavored to work out a method of measurement that would give a clear notion of the value of such a collection of hymns in the light of any purpose used as a standard. As stated in the Introduction he has used the Methodist Episcopal hymnal as a sample to indicate the method, and the approved World Service Program of the Methodist Episcopal Church as a standard.

This program states that "it is more nearly approximating the whole program of Jesus Christ for <u>this</u> world than ever before." (Printed program - fly leaf) As stated elsewhere, it seems to make four demands:

1 - a world viewpoint
2 - an attitude of service for others
3 - a systematic expression of that attitude
4 - a willingness to share what one has with those who do not have to the limit of real sacrifice.

In the light of this program, regarding the Methodist Episcopal hymnal, the results of this study are as follows:

From Section 1

1 - Deducting the Godward measures of ek, the measures of the first group reveal a relation between the selfness of the hymnal and its otherness of 8559 to 1184 or 7.23 to 1

2 - The measures of the second group taken as a whole reveal a relation between the gamma measures and the beta, doe,

teen, char measures of 8401 to 2934 or 2.86 to 1. But taking only those measures in commands that reveal service from the standpoint of what is commanded we have a relation of 9922 to 1413 or 7.02 to 1

There was no emphasis that could be measured with a char.

3 - A study of the third group shows 8120 aht measures, 2944 nau measures, and 271 dass measures.

4 - The measures of the fourth group reveal a relation of 11,335 total measures to 2957 S measures or 3.8 to 1. Deducting the SS measures under commands as above, we have 11,335 to 1436 or 7.89 to 1. Thus groups one, two, and four harmonize:

1st. group	7.23 to 1
2nd. group	7.02 to 1
4th. group	7.89 to 1

5 - Of the 11,335 emphases studied in this section only 294 have a world viewpoint or .025.

6 - There are 41 emphases referring to our country allocated under Statements not otherwise Considered. Thinking of our country as a nation among nations, everyone is self-centered. There is not a hint of the great service this country has been rendering other countries for many years, such service as a christian country ought to render its neighbors.

Section II

1 - The study of the activity of the Christ of the hymnal (see comments page 903 and charts) reveals neither a program nor a leadership that harmonizes with the standard in the particulars measured.

2 - The same remark applies to the God of the hymnal (see comments page 1084 f. and charts).

3 - The heaven of the hymnal is crase self-centered. Even poor,old Dives "being in torment" (Luke 16:23) sets a far better example. (see comments page 1165)

4 - There are 789 measures of rewards. All but twenty of these are pictured as external to the task in hand, and presented in the next world. Practically nothing of the rewards arising immediately from service is mentioned. (see comments, page 1402)

5 - There were found 193 emphases disparaging this world and life, and 251 emphasizing the idea that this world is a good place to leave; making a total of 444 emphases on other-worldliness exclusive of those included under the

study of Heaven and Kindred topics. On the other hand the World Service Program is insistant that this world is not a good place to leave, but rather a good place to make better.

6 - There is no clear-cut discussion of sacrifice as understood in the World Service Program, tho this is so vital a matter to this program.

7 - The whole matter of stewardship which the church has been emphasizing at great expense for several years is treated definitely only in two stanzas of one hymn: 688 I 1-4 and 688 II 1-4.

THEREFORE

We Conclude

A - From the studies of the first section that tho an emphasis on otherness thruout the church is vitally necessary to the success of the World Service Program the Methodist Episcopal hymnal shows 7 measures on selfness to 1 on otherness.

And tho the World Service Program demands a world viewpoint we find this emphasized in this hymnal only at the rate of 1 to 38.55; that is, in the 11,335 measures taken for every measure containing a W there are 38.55 measures that do not contain a W.

B - The studies of the second section also show a great lack of harmony between the measures taken and the demands of the standard.

D

FUNDAMENTAL

PROPOSITIONS

Proposition I

Every afferent nervous impulse tends to have accompanying it a change in consciousness, and, therefore, has an educative value. The matter of psychophysical relation has been receiving attention for a number of years. A paragraph in the work of Arthur I Gates * seems to sum up admirably the work of previous investigators. "We must admit at the outset that if we stand by the scientific proof, we cannot say with any certainty that the activity of any organ produces a sensation or some other state of consciousness in the same manner that a muscle produces a movement or a gland produces a secretion. All we can say is that the activity of certain organs seems to be a necessary condition of conscious experience. These organs are certain neurones located mainly or wholly in the cortex or outer layer of the brain. The assumption is that the nerve impulse, initiated at the sense organ, is relayed thru the cord and the mid-brain by axons leading to the sensory area in the cortex of the brain. When these cortical neurones are thrown into action by the nerve impulse, we have the condition under which consciousness occurs. The cortex seems to to be the immediate physical basis. or, if you wish, the organ of consciousness.

Several lines of evidence favor the hypothesis that activity of the neurones in the cortex of the brain is the basis of conscious experience. The fact that a blow on the head or the stoppage of the flow of blood to the brain results in loss of consciousness is suggestive, but not conclusive evidence. More convincing proof has been secured by the observation of the effects of partial loss or destruction of the cortex by injuries, operations, or disease. The removal of certain areas of the cortex invariably results in the loss of certain kinds of consciousness. The removal one area results in the loss of visual sensations - the individual is unable to see even when the eye and the sensory nerves are unimpaired. When another area is removed, the individual is unable to become aware of, (conscious of) sounds, altho the ear and the sensory neurones are uninjured. The destruction of other areas abolishes the sensations of pain, cold, heat, pressure, taste, or smell. Widespread cortical removal results in losses of images, memories, and other conscious experiences even tho all other bodily organs - the sense organs, the cord and mid-brain, motor nerves, muscles, and glands - are left in tact.

Science is unable to explain the relation between activity of the cortex and consciousness. The immediate stimulous is the nerve impulse. When it traverses certain cortical neurones a sensation or some other conscious state occurs, but just how or why is quite unknown. The circumstances, to use a rough analogy, are similar to those attending the production of light in an electric bulb. The electric current flows along the wire with no observable effect, but, when it reaches the filament, there is a brilliant flare. No one knows as a matter of fact, what electricity is or precisely why it should, when circulating thru the filament, produce light rather than a sound, and odor, or some other result. Of course,

a certain number of facts are known concerning the property and effects of the electric current, which provides an approximation to the explanation of the occurance of light, but the explanation is not complete or ultimate. Less is known concerning the properties of nerve impulses and their effects on the neurones of the cortex, but the evidence, nevertheless, is such that we must assume that nerve impulses flowing thru certain neurones are the necessary conditions of consciousness, even if a complete or ultimate explanation of how or why is not available."

Proposition II

Every expression contained in a hymn when sung by a worshiping groupusing a hymn-book is enforced thru the sight, the hearing, the kinaesthetic feeling of the vocal cords, the rhythm of poetry, the rhythm of music, the affirmation and approval of a group of fellows, and usually by repetition. Also attention is better controlled and the memory tends to be more retentive.

Proposition III

Not only are ideas being thus forcibly insisted upon, but also in the atmosphere created there is always potential emotional expression, and frequently ideals are being formed under high emotional pressure.

'The development of an ideal is both an emotional and an intellectual process, but the emotional element is by far the most important. Ideals that lack the emotional coloring are simply intellectual propositions, and have little directive force in moral conduct." Bagley, W. C. The Educational Process p. 223, quoted by Coffin, J.H. Dr. Walter S. Athearn in class-room lecture says that "an ideal is an idea shot thru with emotion." Further references are as follows:

Proposition IV

Historically hymns have been very important in moulding the ideas of the devotees of religion.

The value of hymns as a teaching medium was recognized at an early date. At the close of the Babylonian hymn to Enlil occurs a

litany used for didactic purposes. Another hymn is used to set forth the Babylonian conceptions of Nergal. Speaking of the early Hindu hymns T. W. Rhys Davids says, "In the early times in North India such hymns or verses were intoned or chanted either for edification or for propoganda.

In the latter part of the third century the church took a stand against the prose hymns used because of their service to the gnostic . At the end of the second century it was necessary for Ephraim, the Syrian, to compose hymns in accord with the church because of the heretical teaching content of those composed by Harmonius under the influence of Bardaisan. "He made use of hymnody to spread orthodox doctrine, just as Harmonius and Bardaisan had used it, and as the Arians did to spread their erroneous teaching." "They went about Constantinople at night chanting antiphonal hymns to support their heresy, while the catholics imitated their example." Most of Prudentius' hymns were didactic and polemic.

But in more modern times also evidences of the recognition of the teaching value of hymns are not lacking. "It was his (Cranmer's) desire that English versions of the old church hymns should have a placein the projected new service books. It is not that the influence of Calcin and Bucer had to do with the abandonment of this project. The Calvinists made use of hymns to spread their ideas in early non-Conformist days. The growth first of Arianism and then of Socinianism in the English Presbyterean churches necessitated a special provision for worship. This was usually made by eliminating from the hymns of the orthodox writers every allusion to the Trinity, the Incarnation and the Atonement.

"Protestants and Catholics alike testify to the effect of Luther's hymns. Coleridge regarded Luther as doing as much for the Reformation by his hymns as b his translation of the bible, while the Roman Catholic Cozzernius asserted that'the hymns of L ther destroyed more souls than his writings and sermons.'" Proposition V

Literary content may be objectively measured. Scales for the measurement of the compositions of school children have been developed notably that of Dr. Hillegas. Scales for the measurement of various kinds of text-books in secular education have been created. In the immediate field of Religious Education Dr. C. C. Peters has measured the content of church school text-books and produced a score card. Therefore the udea of measuring literary content is not an innovation.

For the purposes of these study the World Service Program has been used as a standard. It is considered as having four fundamental emphases.

2 - an attitude of service for others
3 - a systematic expression of that attitude
4 - a willingness to share what one has with those who do not have to the point of real sacrifice.
